

I strongly oppose NAB petition 04-160. I pay for XM radio and really enjoy listening to it. I have made several driving trips and it is so nice to have access to radio and information, no matter where I am, without losing a signal or trying to find a local station while I am driving. I think the FCC and congress have more important issues to be concerned about, and as a taxpayer, I would appreciate you not wasting time on this petition. XM provides an excellent service and I appreciate the benefits I get from their programming. In summary, I ask that you reject the NAB's petition 04-160.
